Authorization for this examiner's amendment was given in a telephone interview with Mr. Brian Hameder on January 16, 2007.

The application has been amended as follows:

IN THE CLAIMS:

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The instant invention has been deemed to be an unobvious improvement over U.S. Patent 3561214 to Bobst. Bobst discloses a replenishing/flushing device for a circuit having a pump (1)

Art Unit: 3745

and motor (2) connected by two main ducts, a replenishing valve (22''), means (~19, 3) for causing the replenishing valve to open and close as a function of a parameter representing a state of the circuit other than the main duct pressure, and a control valve (20), wherein the replenishing valve includes a moving member (18), an opening control chamber (space below 18) and a closing control chamber (space above 18). The unobvious improvement includes having the opening control chamber connected to one of the main ducts via a first link duct.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
